- ❑ Cultural tie-in via Yoruba storytelling and signage.
- ❑ Ongoing youth and school-based engagement initiatives.

60%
of workforce sourced locally

200
students engaged in 'Manatee Guardians' program.

SAVE
THE WEST AFRICAN
MANATEE
NOW
Promoting Biodiversity Conservation
GRIP PLC is committed to protecting the endangered West African manatee. Through our partnership with the Nigeria Trust Fund and the WWF, we are increasing awareness and implementing initiatives to prevent poaching and habitat loss.
This effort reflects our dedication to safeguarding blodiversity and supporting global sustainability goals.

GRIP IS WHERE
BIODIVERSITY MEETS
MEGAWATTS.

POWERING PROGRESS.
PRESERVING NATURE.

Forward Outlook (H2 2026 – H1 2027)

- ❑ Expansion to adjacent tributaries (+18 hectares).
- ❑ Partnership with UNILAG's Marine Biology Unit.
- ❑ Carbon-linked biodiversity credits in development.
- ❑ UNDP Equator Prize nomination and global advocacy.

"GRIP is not just a solar company – It's a biodiversity-integrated infrastructure platform.

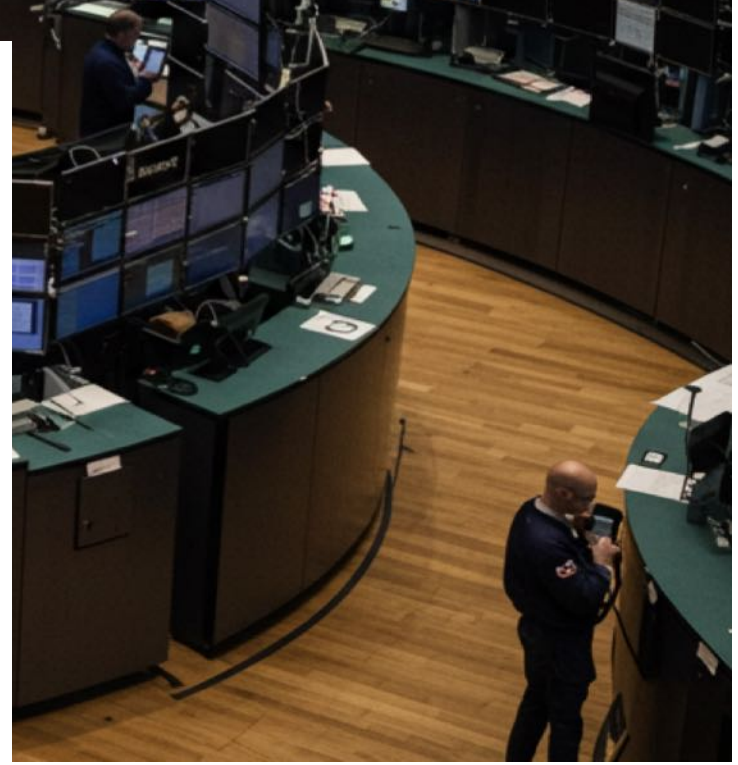

We are developing West Africa's first species-linked power utility – scalable, certifiable, and monetizable across infrastructure, carbon, and biodiversity credit markets."

Strategic Significance

- ❑ Positions GRIP as Nigeria's top ESG-compliant utility stock.
- ❑ Enhances Frankfurt listing and international investor confidence.
- ❑ Boosts reputation, access to ESG funds, and SDG alignment.
- ❑ Delivers measurable biodiversity and carbon impact.
